Attack and Penetration Services

There's truth to the saying, "you're only as strong as your weakest link." Using our sophisticated tools and deep bench of security experts, threat researchers, and intelligence engineers, we can help you discover and mitigate breakdowns in your security infrastructure.

Breach Probability Analysis

Trapp Technology's security researchers and practitioners have years of penetration and attack testing experience. We routinely assist organizations with assessing policies, procedures and the human element of complex systems. As part of our commitment to quality and client service, we deliver detailed documentation of our findings along with actionable recommendations to eliminate problems now and in the future.

How is a probable threat determined?

- Identify business assets
- Determine business positive and negative valuations
- Classify attackers' likely motive
- Evaluate comparable attacks by organization type and industry
- Weigh against latest dark market data

Redefining IT ∞ SM

Reveal Weaknesses to Harden Security and Protect Your Assets

Vulnerability Assessment

Bring your vulnerabilities to light – before they're discovered by the dark web. Paired with recommendations for remediation, our experts evaluate your entire environment, or specific systems, for critical vulnerabilities.

- Public Information Profile
- Vulnerability Scan
- Wireless Security Assessment
- Voice Over IP Assessment

Penetration Testing

By copying the actions of your potential attacker, we help to identify gaps in your current security posture, and provide detailed and prioritized recommendations for remediation.

Our team of elite security experts will:

- Uncover exposures and vulnerability in your technologies, processes, and people
- Devise a prioritized remediation plan to minimize your attack surface
- Lower your risk of infiltration and build confidence in your ability to detect, respond, and prevent intrusion

Phishing Testing

Phishing victims are likely to encounter banking trojans, adware, or credential theft attempts at the other end of an unfortunate click. Our tools and experts will:

- Evaluate your organization's ability to identify a phishing scam
- Pinpoint weaknesses and recommend action plan
- Supply leadership and management with education action plan for ongoing training

Trapp Technology Advantage

TRUSTED EXPERTISE

Trapp Technology's security professionals have the technology skills and business savvy that address security vulnerabilities, manage risk, and allocate resources.

PROGRESSIVE TECHNOLOGY

Armed with our knowledge of industry-leading best practices, Trapp Technology's helps you stay ahead of business-relevant threats.

VALUED PARTNERSHIP

When we call ourselves your partner, we take it to heart. Our clients gain access to our deep bench of experts that fill in the skill, bandwidth, or resource gaps in your team.

CUSTOMER CENTRIC

Agents available 24/7/365 across multiple channels in over 80 languages – our global reach instills confidence.
