

# QuickBooks Online vs. QuickBooks and Trapp Technology

Many businesses choose QuickBooks Online for a cloud hosted accounting solution – only to find themselves elbow deep in synchronization issues, slow performances, sparse functionality, and unproductive calls to support. Yikes.

Instead, businesses can host their desktop QB software with Trapp Technology to get the desktop performance and feel they need with the mobility and multi-user convenience of the cloud.

No relearning software. No issues. No headaches. Just plain business.

## FEATURE COMPARISON
