

IT Assessment Workshop

What is your technology strategy?

Technology is rapidly changing, and businesses are looking at more economical and efficient ways to delivery technology services. At Trapp Technology, our team is devoted to evaluating your business's technology environment and services, identifying areas for improvement, and offering a comprehensive strategic roadmap for you IT needs.

What is Trapp Technology's mission?

Our mission is to provide you with a holistic understanding of your current cybersecurity posture and an immediate plan of action. Our ultimate goal is to be your trusted business partner helping drive clarity and providing IT solutions that solve your technology challenges.

Why participate in an IT Assessment Workshop?

This intensive workshop will allow your business to identify and assess your current delivery of technology services and to find strategic solutions to improve efficiencies and your budget.

What is the IT Assessment Workshop process?

TECHNICAL WORKSHOP SESSION (REMOTE OR ONSITE)

The workshops consist of an involved technical discussion with a technology advisor around your existing tools, services, policies and processes such as:

- Current support model (Outsourced, In-House, Combination)
- Review current environment (Cloud, On-Prem, Hybrid)
- Critical application and support review
- Technology budget review
- Service Level Agreement review
- Cybersecurity controls, services, and capabilities
- Technology standards and best practices

POST WORKSHOP

Following the workshop data gathering, our team of advisors will process the content from our working session and tailor a deliverable report for your business detailing key findings, gaps, and recommendations that support the stated business requirements and goals.

DELIVERABLE REVIEW MEETING (REMOTE OR ONSITE)

We will present your business executives with comprehensive documentation and actionable recommendations designed to assist them in making an informed decision on their path towards a secure environment.

THE TRUTH

By 2024, **30% of enterprise buyers** will demand managed network services (MNS), which is an increase from fewer than 10% in 2020.

KEY WORKSHOP MILESTONES
