

# Risk Management Workshop

Are you ready for a data disaster?

Understanding your business's risks and the impact they cause is critical. At Trapp Technology, our team is devoted to evaluating your business's disaster recovery readiness, reviewing and assessing relevant regulatory compliance, and offering a strategic plan of action to help your business mitigate risk, align with industry standards, and streamline your business continuity.

## What is Trapp Technology's mission?

Our mission is to work with your business leadership in achieving an understanding of your current risk posture and providing an immediate plan of action. Our ultimate goal is to be your trusted partner helping drive clarity and providing IT solutions that help mitigate your business' risks.

## Why participate in a Risk Management Workshop?

This intensive workshop will allow your business to identify and assess your current risk posture and to find strategic solutions to correct any areas of weakness and gaps allowing your business to be more defended and prepared in the event of a data disaster.

## What is the Risk Management Workshop process?

### TECHNICAL WORKSHOP SESSION (REMOTE OR ONSITE)

The workshops consists of an involved technical discussion with a Risk Management Expert around your existing tools, services, policies and processes such as:

- Business Continuity and Disaster Recovery
- Incident Response and Security Management
- Risk Mitigation Strategies
- Crisis Communication
- Process Management

### POST WORKSHOP

Following the workshop data gathering, our Risk Management Experts will process the content from our working session and tailor a deliverable report for your business detailing key findings, gaps, and recommendations that support the stated business requirements and goals.

### DELIVERABLE REVIEW MEETING (REMOTE OR ONSITE)

We will present your business executives with comprehensive documentation and actionable recommendations designed to assist them in making an informed decision on their path towards a secure environment.

### THE TRUTH

Downtime is a persistent risk, with a single event topping losses of **\$11,000 per minute.**

### KEY WORKSHOP MILESTONES

#### Kick-Off Meeting

- A Trapp Technology Representative will coordinate a 30-minute meeting for introductions, setting the agenda, and scheduling the workshop

#### Workshop Meeting Benefits

- We offer flexibility with remote or onsite sessions
- Risk Management Experts available nationwide

#### Deliverable Review Meeting

- We will present key findings and recommendations to your executive leadership
- Define actionable items and next steps to getting your organization on the path to a secure environment
